

Bharavi

Your Business Transformation Platform

ONDC Adapter - Microservices Architecture

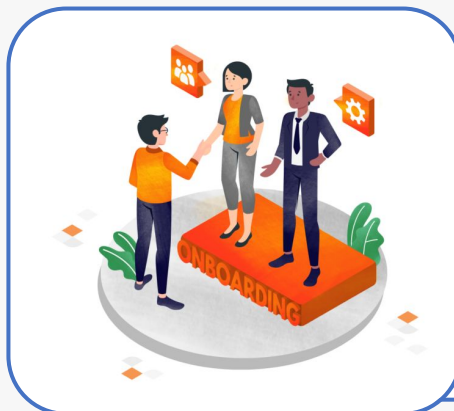

The wrapper APIs will be available in these platforms

Bharavi Lite – SocioTechnological Platform

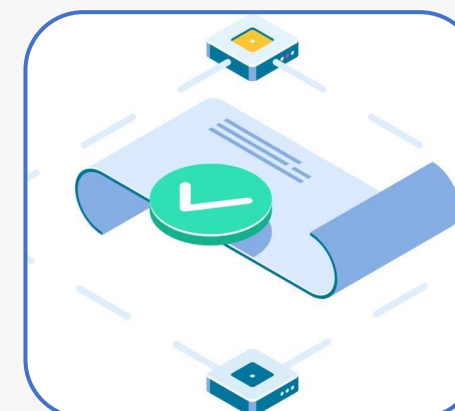

Our platform stands out by seamlessly addressing the myriad challenges faced by small and micro-businesses in transitioning online. Offering a revolutionary combination of Plug-n-Play Services with Codeless Integration, Multilingual support, and an array of AI-driven features such as automated verifications, video KYC, and competitive market price evaluation, our app is a game-changer. What truly sets us apart is the holistic empowerment we provide – from effortlessly creating white-labeled virtual stores in minutes to enhancing product listings with AI-based image tools. By leveraging our robust network and third-party integrations, businesses gain unparalleled confidence to thrive in the expansive world of digital commerce.

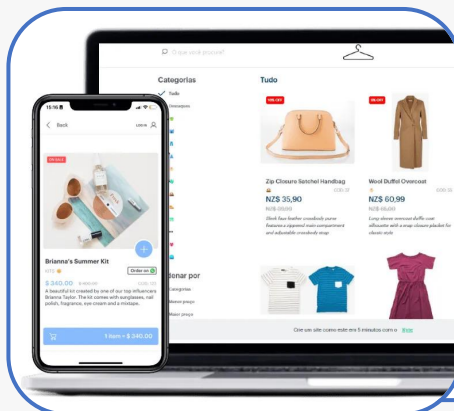

Seamless Onboarding

Businesses effortlessly create white-labeled virtual stores in minutes, utilizing our **Plug-n-Play** services and **codeless integration**.

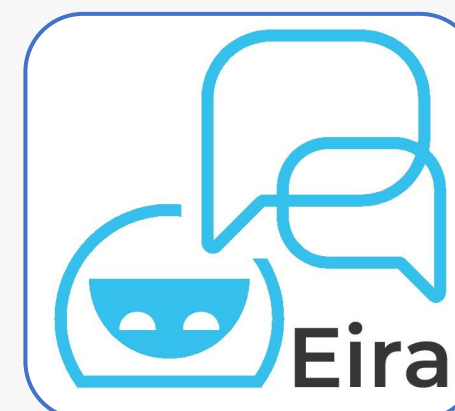

Automated Verification

AI-driven processes ensure swift and accurate **Aadhaar, PAN, GSTIN, and Bank Account verification**, enhancing the onboarding experience.

AI-Enhanced Catalogs

It offers an AI-based automated **catalog generator** and **image enhancer**, optimizing product listings for maximum visual appeal and engagement.

Multilingual Chatbot

Voice and Text enabled chat bot which supports **"Indian Regional Languages"**, gives ease of customer support 24x7.

Market Intelligence

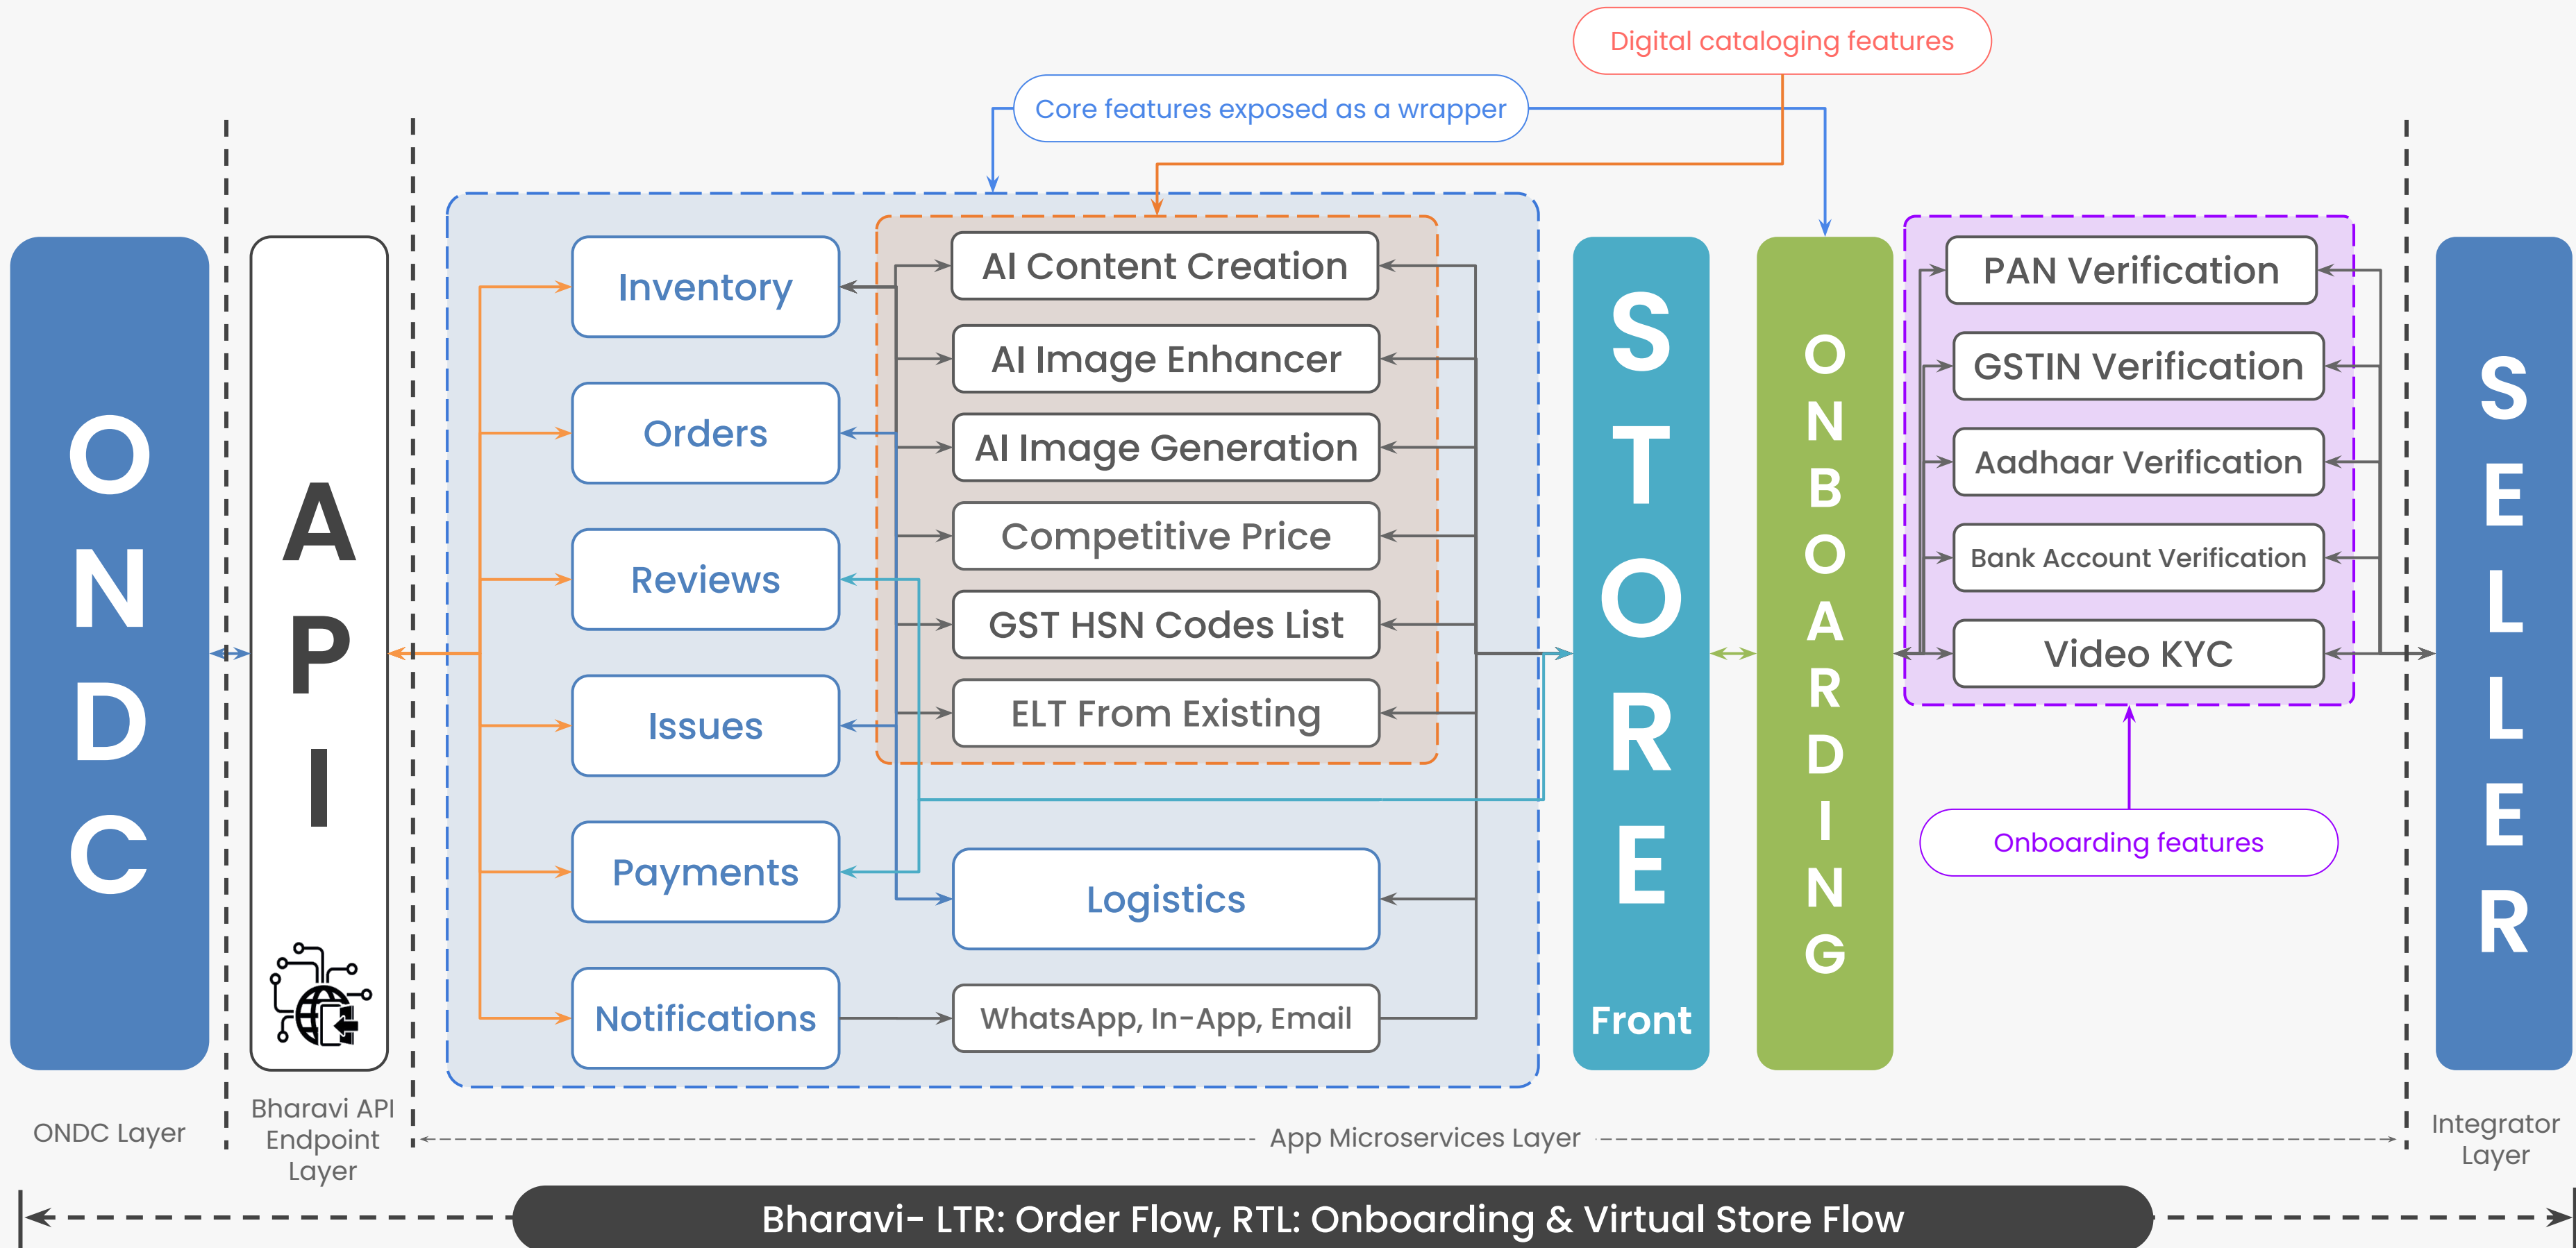

Businesses benefit from an AI-based competitive **market price evaluator**, empowering informed pricing decisions.

Multi Channel Communication

Multi **communication between buyers and sellers** to address their queries without language barriers
